

# FIBRE PROCUREMENT POLICY

Meadow Lake Mechanical Pulp Inc. is committed to environmentally sound business practices. We believe that our commitment to the environment starts with the procurement and subsequent use of wood fibre in the company's manufacturing process.

## We provide assurance to our customers that we are:

Using procedures to facilitate the transfer of responsibly-managed wood fibre through the supply chain;

Monitoring our fibre sources to ensure that the wood fibre is not sourced from:

- Illegally harvested wood;
- Wood harvested in violation of traditional or civil rights;
- Wood harvested in forests where high conservation values are threatened by management activities;
- Wood harvested in forests being converted to plantations or non-forest use;
- Wood from forests in which genetically modified trees are planted.

We maintain a Chain of Custody Management System, including objectives and controls, continually monitoring and improving our performance; and communicate our records to all interested parties.

**Our approach to forest protection, use and renewal ensures that all forest attributes will be conserved for future generations.**
